

Okuru Christian Ubughenaan

Frontend Web Developer

✉ okuruchristian@gmail.com ☎ +2349059952426

Summary

Frontend developer with 4 years of experience building websites people actually enjoy using — mostly with Nuxt.js, Vue.js, Next.js, Tailwind CSS, and shadcn/ui. I like writing clean, reusable code that's easy for other developers to pick up later, and I care about the small details: fast load times, smooth interactions, and interfaces that work well on any screen. I've worked closely with designers and backend teams to turn ideas into finished products, and I'm always looking for better ways to build things.

Professional Experience

Frontend Web Developer, *BernodeHub*

03/2022 – 05/2025

- Collaborated and developed the official Mojoda FC football club website using Vue.js, delivering dynamic player profiles, match fixtures, league tables, and club news in a fully responsive interface.
- Collaborated with a team of frontend developers to build a movie discovery platform using Next.js and Tailwind CSS, enabling users to browse films, watch trailers, and access external streaming platforms.
- Integrated movie data from the The Movie Database API to dynamically render trailers, ratings, and film metadata within the application.
- Manage projects end-to-end, from component architecture to deployment — across fashion, beauty, and gadget e-commerce niches
- Integrated frontend interfaces with backend APIs
- Collaborate directly with clients to scope requirements, iterate on feedback, and ship production-ready sites
- Used **AI development tools** to accelerate debugging, code generation, and documentation

Calabar,
Nigeria(Remote)

Front-End Developer (Volunteer), *New Horizon*

02/2021 – 09/2021

- Translated UI/UX designs from Figma into responsive web interfaces using modern frontend frameworks.
- Built reusable React components and responsive layouts to ensure cross-device compatibility.
- Integrated backend APIs to dynamically render application data within user interfaces.
- Collaborated with designers and backend developers to enhance UI consistency and optimize user experience.

Education

Electrical/Electronics Enigneering, B.Eng, *Afe Babalola University, Ado Ekiti.*

09/2017 – 10/2022

Ekiti State, Nigeria

Certificates

National Youth Service Corps (NYSC)

Completed

(Certificate available)

Skills

Frameworks

Nuxt.js, Vue.js, Next.js

Languages

JavaScript, TypeScript

Styling

Tailwind CSS, shadcn/ui

Tools

Git, VS Code, Figma-to-code workflows

Additional Skills

- Strong written and spoken English communication
- High level of reliability and confidentiality
- Ability to work independently in remote environments
- Fast learner with strong problem-solving abilities
